United States

Liberia

Objective : Provision of standard IT hardware and software equipment to U.S Federal Prime Contractor domestically and internationally through a general IT catalog, maintained and updated quarterly.

Needs Assessment : The Headquarters Office issues a purchase order to IPA based upon the current catalog pricing in place. IPA maintains the catalog to update pricing and replacement products on a quarterly basis (or when necessary).

Equipment & Supplies : HP printers and toner cartridges; a variety of software packages; scanning equipment; battery backup units; miscellaneous computer equipment; projectors & screens – as well as a variety of additional products.

Supply Chain & Logistics : Tailored supply chain with a combination of consolidation of equipment in warehouses (both domestically and internationally) as well as direct shipment to the field office – often to include inland African destinations.

Support & Aftersales : IPA honors and facilitates all hardware and software provider and manufacturer warranties of the products and services purchased by providing replacement spare parts for all items mentioned above. We also work to coordinate repairs with local service providers, even after the manufacturer’s warranty has expired.
